SUMMARY

Full-Stack Developer with 2+ years of experience building production web applications with a strong focus on React, Next.js, TypeScript, and modern frontend architecture. Experienced in developing scalable user interfaces, integrating REST APIs, working with authentication and databases, and delivering end-to-end web solutions. Built and contributed to production platforms across business automation, AI-powered customer communication, laboratory services, quality control, and textile manufacturing.

EXPERIENCE

Full-Stack Developer

Cresta

Uzbekistan

- Played a key role in building the digital infrastructure of a newly established development company.
- Developed and delivered the company's corporate website, providing its primary public-facing web presence.
- Built and integrated a Telegram bot to support communication and business workflows.
- Contributed to the development of the company's CRM system, supporting internal business operations and client management.
- Worked across frontend and backend functionality to deliver production-ready solutions from development through deployment.

Full-Stack Developer

AI Avtojavob / Aylo

Cresta

- Built an AI-powered sales automation platform designed for businesses managing high volumes of customer inquiries across social media.
- Developed a unified platform connecting Instagram, Telegram, Facebook, and WhatsApp to automate customer communication and sales workflows.
- Implemented automated Instagram comment detection, allowing businesses to associate keywords with posts and trigger AI-powered direct-message responses when customers interact with those posts.
- Built customizable AI prompts that allow businesses to control how the assistant communicates with potential customers and responds to inquiries.
- Developed business-facing and administrative interfaces for managing integrations, posts, automation rules, prompts, and customer interactions.
- Implemented an onboarding flow allowing businesses to register and connect their communication channels with minimal setup.
- Contributed to the platform's automation and AI-driven customer-response workflows.

Full-Stack Developer

Sifat Nazorat

Toshkent Sinov Xizmati

- Developed Sifat Nazorat, a digital quality-control platform for managing and verifying laboratory testing and product certification information.
- Built a QR-based verification system allowing users to scan product QR codes and access dynamically generated verification pages.
- Implemented dynamic routes for individual products and producers, connecting publicly accessible verification pages with underlying database records.
- Developed the platform using Next.js, TypeScript, and MongoDB, integrating backend services and database operations into the application.

- Implemented authentication and protected application functionality using Supabase Auth.
- Built responsive interfaces for laboratory services, product information, verification workflows, and company content.
- Worked on the platform's file and media management infrastructure, integrating external storage solutions for uploaded content.
- Designed the system around real-world laboratory and quality-control workflows rather than a static informational website.

Full-Stack Developer

T-SX

Toshkent Sinov Xizmati

- Developed the official corporate website for Toshkent Sinov Xizmati, presenting the company's services, activities, and organizational information.
- Built a dynamic news and content management system allowing company administrators to manage website content through a dedicated admin interface.
- Implemented a photo gallery for showcasing company activities, facilities, and events.
- Developed the company's administrative interface for managing website content and maintaining up-to-date public information.
- Structured the platform to support ongoing development of communication and CRM functionality for internal business workflows.

Full-Stack Developer

Fimtext

Textile Testing & Quality Control Laboratory

- Developed the official landing page for Fimtext, a textile testing and quality control laboratory.
- Built a responsive, modern interface presenting the laboratory's services, capabilities, and company information.
- Focused on clear information architecture and responsive user experience across desktop and mobile devices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, shadcn/ui

State & Data: Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod

Backend: Node.js, Express.js, REST APIs

Databases & Services: MongoDB, PostgreSQL, Supabase

Authentication: Supabase Auth, JWT, HTTP-only cookies

AI & Automation: AI API integrations, n8n, Telegram Bot API, social media API integrations

DevOps & Tools: Git, GitHub, Docker, Vercel, Cloudflare, Linux/WSL
